Outgoing and enthusiastic worker. Excels at working with others to provide quality in any position. Dedicated worker who is always looking to improve. A fast learner with strong intrapersonal skills.

Experience

Lock Project Manager | Media Real Estate | Media, PA | May 2019-December 2022

- Selected correct electronic lock system for over 800 apartment units
- Worked with tenants, contractors, management and tech support to ensure smooth transition to biometric locking systems

Facilities Technician | Center for Family Services | Vorhees, NJ | May 2017- May 2019

- Write and Install Master Key system
- Maintain facility locks
- General construction including drywall, door hanging, flooring, kitchen installation, and painting
- Building repair including flood remediation and other damage repair
- Participated in a company wide effort to convert light fixtures from incandescent to LED
- Updated and maintained basic electrical features such as light fixtures, outlets, and switches
- Comply with federal privacy policies protecting the tenants of the maintained facilities
- Snow preparation

Lock Technician | West Philadelphia Locksmith | Philadelphia, PA| December 2016-April 2017

- Performed Customer Facing while in shop
- Manage organization of shop products and key blanks for ease of other technicians
- Both duplicated and cut keys by code for customers
- Handled repairs at customer locations with and without supervision
- Opened Locks for customers locked out of their homes and cars
-

PROJECTS

- Minesweeper
 - Built a version of minesweeper using vanilla Javascript
 - <https://standarddemacian.github.io/Minesweeper/>

- Arkham Horror Deck Builder
 - My first full stack application! Used JS,HTML,CSS, for the front end and MongoDB and express for the back end.
 - <https://standarddemacian.github.io/Arkham-Horror-Deck-Builder-Client/>
- Clown Forum
 - My group and I saw a need for the clown community to have a way to share information and posts. We made it using JS, React, HTML,CSS for the front end and the back end uses Mongo and express. I really thrived during this project. Teamwork is exactly where I excel.
 - <https://clowning-around-client.onrender.com/>
- AI- Tunes
 - For the final project of my General Assembly course I created an app that tests your music lyric knowledge. It required the use of two separate API calls feeding information into one another to spit back the random lyrics spoken by a text-to-voice API.
